

HIDAIIS, Hidais es un producto en polvo que mezclado con cemento tipo Portland, en morteros, le confiere excelentes propiedades hidrófugas, asegurando su impermeabilidad, sin pérdida de otras características. No contiene cloruros.

Descripción

Additive powder, repellant water for making mortars with waterproof properties. Is added to the dough made??, never over water. Ideal for concrete foundations, galleries, tunnels, piers, docks, to waterproof plaster pools, tanks, etc..

Aplicación

Modes of application

HIDAIIS is added to cement mortar and dry aggregates by mixing thoroughly in a proportion of 25 according to cement weight (1 kg for each cement bag of 50 kg).

Mixing water is then added to obtain the required consistency (HIDAIIS must be added onto water directly). Apply cement mixed with mortars and concrete, together with drained river sand and 0 to 2 mm quartz aggregates.
