

Descripción

Resin finishing concrete printed PAVIMPRES pavements , which grants them very decorative satin finish. colorless

Aplication

As a finishing resin on concrete and printed concrete pavements that provides them a satin finish, frost protection , improves durability, prevents absorption of stains, homogenizes and revives appearance.

Surface preparation

Must be clean, without grease, dust, loose parts, appearing compact and perfectly dry.

Modes of application

Shaking the product in order to homogenize it.

The product must be applied by brush, roller or spray pistol.

-The surface of the appliation must be cleaned, cleaned and dry, free of dust and loose particles.

RESIMPRES is applied directy on the pavimento for protecting, applicating one single hand and spreading properly the product. If two hands must be applying the second one will be apply after the first one becomes

dry.
It is applied directly, undiluted.
-Is very important that the concrete doesn't have moisture in order to avoid the bleach of the product.
-Not apply with high temperatures., if it is going to rain, with strong wind or with frosts.

Clean up

With plentiful clean water.

Data sheet

Colour/s Translucent.

Density 1,05 Kg./litre \pm 0,05 at 20°C.

Totally dry 24 Hours / 50 micros dry layer/20°C/65% of RH.

Temperature of work From 8 to 25°C.

Performance

8 sqm per litre

Storage

2 years, in their original packagings and properly closed, at a temperature not lower than 5 ° C, protected from the weather.
